In the matter of)

Modification of Parts 2 and 15 of the)
Commission's Rules for unlicensed devices and)
Equipment approval.)

ET Docket No. 03-201

ERRATUM

Adopted: November 19, 2003

Released: November 20, 2003

By the Chief, Office of Engineering and Technology:

1. On September 17, 2003, the Commission released a *Notice of Proposed Rulemaking*, FCC 03-223, in the above captioned proceeding. This erratum makes the following corrections to the *Notice of Proposed Rulemaking*:

(a) Revise paragraph 57 by replacing the sentence "Currently, the Commission's rules do not address re-evaluation intervals for laboratories that submit Part 15 and Part 18 test data for certification," with, "Currently the Commission's rules do not address re-evaluation intervals for laboratories that test devices for Part 15 and Part 18 compliance."

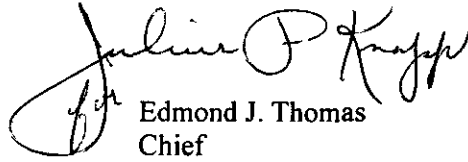

(b) Revise Section 2.948 of Appendix A: Proposed Rule Changes to remove proposed changes to paragraph 2.948(a)(2). The aforementioned paragraph was revised in the *Second Report and Order and Memorandum Opinion and Order* in ET Docket No. 01-278, released July 17, 2003. The text of paragraph 2.948(a)(2) shall continue to read as adopted in that *Order*.

(c) Revise paragraph 2.948(d) of Appendix A: Proposed Rule Changes to read, "A laboratory that has been accredited with a scope covering the required measurements shall be deemed competent to test and submit test data for equipment subject to verification, Declaration of Conformity, and certification. Such a laboratory shall be accredited by an approved accreditation organization based on the International Organization for Standardization/International Electrotechnical Commission (ISO/IEC) Standard 17025, "General Requirements for the Competence of Calibration and Testing Laboratories." The organization accrediting the laboratory must be approved by the Commission's Office of Engineering and Technology, as indicated in § 0.241 of this chapter, to perform such accreditation based on ISO/IEC 58, "Calibration and Testing Laboratory Accreditation Systems--General Requirements for Operation and Recognition." The frequency for revalidation of the test site and the information that is required to be filed, or retained by the testing party shall comply with the requirements established by the accrediting organization. However, in all cases, test site revalidation shall occur on an interval not to exceed two years."

(d) Revise paragraph 15.247(a)(6)(ii)(B) of Appendix A: Proposed Rule Changes to read, "Total power must be reduced by 1 dB for each 3 dB of directional gain above 6 dB of the antenna/array device, as defined in paragraph (iv) below."

2. Accordingly, IT IS ORDERED that this Erratum IS ISSUED pursuant to Section 0.241 of the Commission's rules on delegated authority, 47 C.F.R. § 0.241, and that these corrections SHALL BE INCLUDED in the *Notice of Proposed Rulemaking* prior to its publication in the Federal Register.
